---

This is a quick list of the latest projects I have worked on

- [BetterLesson](#) My full time job these days - BetterLesson is a social network for teachers to share and exchange educational resources, like lesson plans and homework. We are still in private beta, but have a few thousand users already.
- [Cooks' Compass](#) - Find your way in the world of food with this food finder site that helps people locate exotic, ethnic and gourmet ingredients in local shops. Features recipes and reviews of stores. This is a startup that I built with some friends. We are working on the Ruby on Rails version which you can see online [here](#) (NOTE, the rails version is NOT complete, and there are some broken links..).
- myFavz - unfortunate no longer online. Gifting reinvented. Find the perfect gift by asking for hints. Built in Ruby on Rails in only 3 months, this site was shown in the demopit at TechCrunch 50 in September 2008.
- [The Wine Messenge](#) a boutique online wine shop, they find really good and interesting wines from around the world.
